Benjamin:

On July 23, while I was watching the sky, I saw a small vehicle flying across the sky. It was cloudy, so I couldn't see it very well. I drew a picture of it on the other paper.

It was round and had a grayish color that matched with the clouds. The vehicle crossed the sky in a northeast direction and was traveling very rapidly. It crossed the sky in about 15 or 20 seconds and was going around in circles.

I am only 13 and will tell you could give me some information on it.

Yours truly
